IIEST Nexus
Version 1.0

Arijit Saha   Aditya Raj Gupta

July 23, 2019

1 Objective

Our objective is to make an exclusive networking site for IIEST Students. Here, a user can search for other students with skills they require. The relevant peers will be displayed on the basis of rating for user benefit. A user can view the skillset of people in the network. They can also ask for technical help from other users in forums. Users can communicate privately as well.

2 Functional Requirement

We wish to be able to incorporate the following features in the project as functionalities of a user:

- Create Self Profile with skillset, experiences, achievements, etc.

- Search for people

    Based on skills, experience

    Based on identity, ratings

- Chat with a person

- Rate or recommend an associate based on mutual work

- Share achievements, events, contests, blogs

- Focussed forums for technical help

- Make groups with an agenda

- Trending Skills

- Content Moderation
